

Wicomico County FFY2023 Problem Identification

Overall

Wicomico County accounted for 1.7% of the population and 1.7% of the vehicle miles traveled (VMT) in the State of Maryland on average over the past three years (2018-2020). During that time, an annual average of 12 traffic fatalities have occurred in the County, which have trended up then down, ranging from 7 (1.4% of all fatalities in the State) to 19 (3.6%) to 11 (1.9%). The number of serious injuries (defined as KABCO=4 on the police crash report) over the past three years in Wicomico County has been alternating, ranging from 59 to 74 to 63, which are 1.8%, 2.4% and 2.3% of the State total for serious injuries in 2018, 2019, and 2020¹ respectively.

Usually over four hundred thousand citations for traffic violations are issued across the State and adjudicated in Maryland District Courts each year (449,381 in 2018 and 438,451 in 2019)². However, only 323,400 citations were issued and adjudicated in the year 2020 across the State. Over the previous three years, the number of traffic citations issued in Wicomico County has oscillated from 10,603 (2.4% of statewide traffic citations) in 2018 to 11,166 (2.5%) in 2019 to 9,568 (3.0%) in 2020. Aggressive driving crashes occurring in 2020 accounted for 1.6% of all fatalities and 2.3% of all serious injuries in the State.

Aggressive driving citations are rarely issued because a driver must be observed committing three or more specific infractions to qualify under the aggressive driving statute. In Maryland, 793 such citations were issued on average over the past three years. Of those, an average of 11 were issued in Wicomico County (11 in 2018, 10 in 2019, and 13 in 2020).

¹ In 2020, the world experienced the COVID-19 pandemic which contributed to significant changes in roadway travel and driver behavior. Reduced vehicle miles traveled and open roadways resulted in an increase in speed and other risky driving behaviors. Consequently, 573 people died in traffic-related crashes on Maryland's roads, representing an increase of more than seven percent from the previous year's total of 535, with pedestrian and bicycle fatalities comprising over one-quarter of the State's roadway deaths. While overall fatalities increased in 2020, the reduced travel contributed to marked decreases for injury and overall crashes at the statewide and jurisdictional level. Therefore, this anomalous year must be considered when drawing conclusions based on the use of 2020 crash data to evaluate highway safety programs and trends.
